CCA

Thorneliffe Ironworks and Collieries,

Near SHEFFIELD.

1894.

WE have the honour to submit to our Customers and others a
NEW CATALOGUE OF LAMP POSTS AND FITTINGS.

To the former we tender our thanks for past favours, and hope for a continuance of their patronage; from the latter we ask the careful perusal of the list now presented

We have carefully excluded all obsolete patterns, and have added many new designs.

We are assured that for variety and completeness our patterns are not surpassed by any other firm in the trade

The good reputation for strength and quality which our castings have had for quite a hundred years, we shall always endeavour to maintain if not excel; at the same time we believe our prices will compare favourably with other houses.

We shall at all times be pleased to quote for articles to special designs, or to furnish suitable designs for any plain or ornamental castings beyond the scope of this book.

Yours faithfully,

NEWTON, CHAMBERS & CO. LIMITED.

ALL VALVES TESTED TO 30 LBS. PRESSURE PER SQUARE INCH BEFORE LEAVING THE WORKS.
The dimensions give the sizes of the Valves, without allowance for joints, but they will vary slightly. The two joints of the Valves are planed.
The spindles and screws are forged iron. The racks and pinions are best cast steel.

OUTSIDE RACK VALVES and other SPECIAL VALVES made to order.

Also Makers of all descriptions of GAS WORKS PLANT, viz.:-

GASHOLDERS, PURIFIERS, SCRUBBERS, CONDENSERS, HYDRAULIC MAINS, RETORT BED FITTINGS, IRON ROOFS, DRY-FACED CENTRE AND BY-PASS VALVES, &c.

FISHER'S PATENT JOINT (Patent No. 8360) No. 305,

For connecting and repairing Hot Water, Steam, Gas and Water Pipes.

The Joint is made in halves and fastened with malleable-iron keys at each side. For Hot Water work they are corrugated inside, and red or white lead or cement can be used for jointing. The pipes and fittings with plain ends are used for this joint. Defective pipes can be repaired by an inexperienced workman in a few minutes. Joints for underground pipes are made plain inside for caulking.

N.B.—ALL PIPES AND CONNECTIONS TESTED BY HYDRAULIC PRESSURE BEFORE LEAVING THE WORKS.

THORNCLIFFE IRON WORKS, NEAR SHEFFIELD.
